

Books and edited volumes

- 2022 Bialek et al *Physics of Life. A Consensus Study*. W Bialek, B Carragher, I Cissé, MM Desai, OK Dudko, DI Goldman, J Kondev, PB Littlewood, AJ Liu, ME Moxon, JN Onuchic, MJ Schnitzer, and CM Waterman (National Academies Press, Washington DC, 2022).
Interactive guide available at <https://nap.edu/physicsoflife>.
- 2012 Bialek *Biophysics: Searching for Principles*. W Bialek (Princeton University Press, Princeton NJ, 2012).
Reviews include:
A Ma, *Contemporary Physics* **54**, 212 (2013).
SJ Hagen, *Physics Today* **67**, 47 (2014).
- 1997 Rieke et al *Spikes: Exploring the Neural Code*. F Rieke, D Warland, R de Ruyter van Steveninck, and W Bialek (MIT Press, Cambridge, 1997). Japanese edition translated by T Yamazaki and H Kurashige (Morikita Publishing, Tokyo, 2025).
Reviews include:
A King, *The London Times Higher Education Supplement* 17 October 1997, p. 35.
A Zador, *Science* **277**, 772 (1997).
LF Abbott, *Neuron* **19**, 5 (1997).
M Abeles, *Trends in Neuroscience* **20**, 496 (1997).
- 1992 Bialek *Princeton Lectures on Biophysics*. W Bialek, ed (World Scientific, Singapore, 1992).
- 1985 Lewis et al *The Vertebrate Inner Ear*. ER Lewis, EL Leverenz, and W Bialek (CRC Press, Boca Raton, 1985).

Note: References to the physics e-print archive, <http://arXiv.org>, are given when available. If there is no other pointer then this is a primary reference and given in full; for other work the conventional “print” version is the final version and proper reference.

Reviews and perspectives

- 2025 Meshulam and Bialek Statistical mechanics for networks of real neurons. L Meshulam and W Bialek, *Reviews of Modern Physics* **97**, 045002 (2025); arXiv:2409.00412.
- 2025a Bialek The emergence of brains. W Bialek, *PRX Life* **3**, 037002 (2025).
- 2024 Thome and Bialek A brief tutorial on information theory. T Thome and W Bialek, in *Les Houches Summer School Lecture Notes: Theoretical Biological Physics 2023*, A–F Bitbol, T Mora, I Nemenman, and AM Walczak, eds *SciPost Phys Lect Notes* **87** (2024); arXiv:2402.16556.
- 2024a Bialek Ambitions for theory in the physics of life. W Bialek, in *Les Houches Summer School Lecture Notes: Theoretical Biological Physics 2023*, A–F Bitbol, T Mora, I Nemenman, and AM Walczak, eds *SciPost Phys Lect Notes* **84** (2024); arXiv:2401.15538.
- 2023a Bialek Opinion: Biological physics comes of age. W Bialek, *APS News* **32**(4) April (2023).
- 2018 Bialek Perspectives on theory at the interface of physics and biology. W Bialek, *Reports on Progress in Physics* **81**, 012601 (2018); arXiv:1512.08954.
- 2016 Tkačik and Bialek Information processing in living systems. G Tkačik and W Bialek, *Annual Review of Condensed Matter Physics* **7**, 89–117 (2016); arXiv:1412.8752.
- 2011b Stephens et al Searching for simplicity in the analysis of neurons and behavior. GJ Stephens, LC Osborne, and W Bialek, *Proceedings of the National Academy of Sciences (USA)* **108** (Suppl 3), 15565–15571 (2011); arXiv:1012.3896.

- 2011 [Mora and Bialek](#) Are biological systems poised at criticality? T Mora and W Bialek, *Journal of Statistical Physics* **144**, 268–302 (2011); arXiv:1012.2242.
- 2009b [Tkačik and Bialek](#) Cell biology: Networks, regulation, pathways. G Tkačik and W Bialek, in *Encyclopedia of Complexity and Systems Science*, RA Meyers, ed, pp 719–741 (Springer–Verlag, Berlin, 2009); arXiv:0712.4385. Reprinted in *Statistical and Nonlinear Physics B* Chakraborty, ed, pp 449–476 (Springer–Verlag, Berlin, 2022).
- 2004 [Bialek and Botstein](#) Introductory science and mathematics education for 21st century biologists. W Bialek and D Botstein, *Science* **303**, 788–790 (2004).
- 2002 [Fairhall and Bialek](#) Adaptive spike coding. A Fairhall and W Bialek, in *The Handbook of Brain Theory and Neural Networks, Second Edition*, MA Arbib, ed, pp 90–94 (MIT Press, Cambridge, 2002).
- 2002 [Bialek](#) Thinking about the brain. W Bialek, in *Physics of Biomolecules and Cells: Les Houches Session LXXV*, H Flyvbjerg, F Jülicher, P Ormos, and F David, eds, pp 485–577 (EDP Sciences, Les Ulis; Springer–Verlag, Berlin, 2002); arXiv:physics/0205030.
- 2002 [de Ruyter van Steveninck and Bialek](#) Timing and counting precision in the blowfly visual system. R de Ruyter van Steveninck, and W Bialek, in *Models of Neural Networks IV: Early Vision and Attention*, JL van Hemmen, J Cowan, and E Domany, eds, pp 313–365 (Springer–Verlag, Berlin, 2002); arXiv:physics/0202014.
- 2001 [de Ruyter van Steveninck et al](#) Real time encoding of motion: Answerable questions and questionable answers from the fly’s visual system. R de Ruyter van Steveninck, A Borst, and W Bialek, in *Processing Visual Motion in the Real World: A Survey of Computational, Neural and Ecological Constraints*, JM Zanker and J Zeil, eds, pp 279–306 (Springer–Verlag, Berlin, 2001); arXiv:physics/0004060.
- 2000 [Bialek](#) Potenzialità e limitazioni nella misura della transmission dell’informazione neuronale. W Bialek, in *Frontiere Della Vita, Vol. III: Sistemi Intelligenti*, pp 617–629 (Istituto della Enciclopedia Italiana, 2000). English edition: Prospects and pitfalls in the measurement of neural information transmission. *Frontiers of Life, Vol. III: Intelligent Systems* (Academic Press, San Diego, 2002).
- 1997 [Bialek](#) Statistical mechanics and sensory signal processing. W Bialek, in *Physics of Biological Systems: From Molecules to Species*, H Flyvbjerg, J Hertz, MH Jensen, OG Mouristen, and K Sneppen, eds, pp 252–280 (Springer–Verlag, Berlin, 1997).
- 1990 [Bialek](#) Theoretical physics meets experimental neurobiology. W Bialek, in *1989 Lectures in Complex Systems, SFI Studies in the Sciences of Complexity, Lect. Vol. II*, E Jen, ed, pp 513–595 (Addison–Wesley, Menlo Park CA, 1990).
- 1987 [Bialek](#) Physical limits to sensation and perception. W Bialek, *Annual Review of Biophysics and Biophysical Chemistry* **16**, 455–478 (1987).

History

- 2025b [Bialek](#) Forward. W Bialek, in HC Berg, *Random Walks in Biology*. Expanded Edition, Princeton Science Library, pp ix–xii (Princeton University Press, Princeton, 2025).
- 2024b [Bialek](#) Moving boundaries: An appreciation of John Hopfield. W Bialek, arXiv:2412.18030 [physics.hist-ph] (2024).
- 2023b [Bialek](#) Keith Brueckner (1924–2014). W Bialek, *Biographical Memoirs of National Academy of Sciences* (2023); arXiv:2308.16411.
- 2020 [Zierler and Bialek](#) Oral history interview with David Zierler. *Niels Bohr Library and Archives, American Institute of Physics* OH 46349 (2020).

Articles

2020s

- 2026 [Lawson and Bialek](#) When many noisy genes optimize information flow. N Lawson and W Bialek, *PRX Life* to appear (2026); arXiv:2512.14055.

- 2026 Gordiychuk et al Searching for sequence features that control DNA flexibility. M Gordiychuk, J Park, A Basu, T Ha, W Bialek, and Y Zhang, *PNAS Nexus* **5**, pgag167 (2026); bioRxiv 2025.01.02.631081. For a preliminary account with the same title see arXiv:2012.06127.
- 2026 Di Carlo et al Extended mean-field theories for networks of real neurons. L Di Carlo, F Mignacco, CW Lynn, and W Bialek, *Physical Review Letters* to appear (2026); arXiv:2504.15197.
- 2026 Edelson et al The FLEye camera: Sampling the joint distribution of natural scenes and motion. CJ Edelson, P Smith, S Setayeshgar, W Bialek, and RR de Ruyter van Steveninck, *Physical Review E* **113**, 044412 (2026); arXiv:2412.21081.
- 2026 Ramirez et al Probabilistic models, compressible interactions, and neural coding. L Ramirez, W Bialek, SE Palmer, and DJ Schwab, *PRX Life* **4**, 023008 (2026); arXiv:2112.14334v2. This combines and extends Palmer et al (2020) and Ramirez and Bialek (2021).
- 2026 Mayer et al How different are self and nonself? A Tiffeau–Mayer, JA Levine, CJ Russo, Q Marcou, W Bialek, and BD Greenbaum, *PRX Life* **4**, 013027 (2026); arXiv:2212.12049.
- 2025 Bauer and Bialek Ambiguous signals and efficient codes. M Bauer and W Bialek, arXiv:2512.23531 [physics.bio-ph] (2025).
- 2025b Di Carlo et al Neural subspaces, minimax entropy, and mean-field theory for networks of neurons. L Di Carlo, F Mignacco, CW Lynn, and W Bialek, arXiv:2508.02633 [physics.bio-ph] (2025).
- 2025 Bauer et al Optimization and variability can coexist. M Bauer, W Bialek, CW Goddard, CM Holmes, K Krishnamurthy, SE Palmer, R Pang, DJ Schwab, and L Susman, arXiv:2505.23398 [q-bio.QM] (2025).
- 2025 Edelson et al Context dependent adaptation in a neural computation. CJ Edelson, S Setayeshgar, W Bialek, and RR de Ruyter van Steveninck, arXiv:2509.01760 [q-bio.NC] (2025).
- 2025b Lynn et al Exact minimax entropy models of large-scale neuronal activity. CW Lynn, Q Yu, R Pang, SE Palmer, and W Bialek, *Physical Review E* **111**, 054411 (2025); arXiv:2402.00007.
- 2025a Lynn et al Exactly solvable statistical physics models for large neuronal populations. CW Lynn, Q Yu, R Pang, W Bialek, and SE Palmer, *Physical Review Research* **7**, L022039 (2025); arXiv:2310.10860.
- 2025 Sarra et al Maximum entropy models for patterns of gene expression. C Sarra, L Sarra, L De Carlo, T GrandPre, Y Zhang, CG Callan, Jr, and W Bialek, *Physical Review E* **112**, 014408 (2025); arXiv:2408.08037.
- 2025 Scheibner et al Large language models and the entropy of English. CR Scheibner, LM Smith, and W Bialek, arXiv:2512.24969 [cond-mat.stat-mech] (2025).
- 2025 Sokolowski et al Deriving a genetic regulatory network from an optimization principle. TR Sokolowski, T Gregor, W Bialek, and G Tkačik, *Proceedings of the National Academy of Sciences (USA)* **122**, e2402925121 (2025); arXiv:2302.05680.
- 2024 Bialek and Shaevitz Long time scales, individual differences, and scale invariance in animal behavior. W Bialek and JW Shaevitz, *Physical Review Letters* **132**, 048401 (2024); arXiv:2304.09608.
- 2024 Chen and Bialek Searching for long time scales without fine tuning. X Chen and W Bialek, *Physical Review E* **110**, 034407 (2024); arXiv:2008.11674.
- 2024 GrandPre et al Direct estimates of irreversibility from time series. T GrandPre, G Teza, and W Bialek, arXiv:2412.19772 [cond-mat.stat-mech] (2024).
- 2024 McGough et al Finding the last bits of positional information. L McGough, H Casademunt, M Nikolić, MD Petkova, T Gregor, and W Bialek, *PRX Life* **2**, 013016 (2024); arXiv:2312.05963.
- 2024 Nikolić et al Scale invariance in early embryonic development. M Nikolić, V Antonetti, F Liu, G Muhaxheri, MD Petkova, M Scheeler, EM Smith, W Bialek, and T Gregor, *Proceedings of the National Academy of Sciences (USA)* **121**, e2403265121 (2024); arXiv:2312.17684. Commentary by V Galstyan and PR ten Wolde, *Proceedings of the National Academy of Sciences (USA)* **122**, e2422340121 (2024).
- 2023 Bauer and Bialek Information bottleneck in molecular sensing. M Bauer and W Bialek, *PRX Life* **1**, 023005 (2023); arXiv:2212.12471.

- 2022 [Bialek](#) On the dimensionality of behavior. W Bialek, *Proceedings of the National Academy of Sciences (USA)* **119**, e2021860119 (2022); arXiv:2008.09574 [q-bio.NC] (2020).
- 2022a [Lynn et al](#) Decomposing the local arrow of time in interacting systems. CW Lynn, CM Holmes, W Bialek, and DJ Schwab, *Physical Review Letters* **129**, 118101 (2022); arXiv:2112.14721 [cond-mat.stat-mech] (2021).
- 2022b [Lynn et al](#) Emergence of local irreversibility in complex interacting systems. CW Lynn, CM Holmes, W Bialek, and DJ Schwab, *Physical Review E* **106**, 034102 (2022); arXiv:2203.01916.
- 2021 [Bauer et al](#) Trading bits in the readout from a genetic network. M Bauer, MD Petkova, T Gregor, EF Wieschaus, and W Bialek, *Proceedings of the National Academy of Sciences (USA)* **118**, e2109011118 (2021); arXiv:2012.15817.
- 2021 [Meshulam et al](#) Successes and failures of simplified models for a network of real neurons. L Meshulam, JL Gauthier, CD Brody, DW Tank, and W Bialek, arXiv:2112.14735 [physics.bio-ph] (2021).
- 2021 [Ramirez and Bialek](#) Compression as a path to simplification: Models of collective neural activity. L Ramirez and W Bialek, arXiv:2112.14334v1 [q-bio.NC] (2021).
- 2021 [Sinha et al](#) Optimal local estimates of visual motion in a natural environment. SR Sinha, W Bialek, and RR de Ruyter van Steveninck, *Physical Review Letters* **126**, 018101 (2021); arXiv:1812.11878.
- 2020 [Alba et al](#) Exploring a strongly non-Markovian animal behavior. V Alba, GJ Berman, W Bialek, and JW Shaevitz, arXiv:2012.15681 [q-bio.NC] (2020).
- 2020 [Barinov et al](#) Transcription-dependent spatial organization of a gene locus. L Barinov, S Ryabichko, W Bialek, and T Gregor, arXiv:2012.15819 [q-bio.MN] (2020).
- 2020 [Palmer et al](#) What makes it possible to learn probability distributions in the natural world? W Bialek, SE Palmer, and DJ Schwab, arXiv:2008.12279 [cond-mat.stat-mech] (2020).
- 2010s**
- 2019 [Petkova et al](#) Optimal decoding of cellular identities in a genetic network. MD Petkova, G Tkačik, W Bialek, EF Wieschaus, and T Gregor, *Cell* **176**, 844–855 (2019); arXiv:1612.08084.
- 2019 [Rousseau and Bialek](#) Information costs in the control of protein synthesis. RJ Rousseau and W Bialek, arXiv:1912.13017 [q-bio.sc] (2019).
- 2019 [Bialek et al](#) Action at a distance in transcriptional regulation. W Bialek, T Gregor, and G Tkačik, arXiv:1912.08579 [q-bio.sc] (2019).
- 2019 [Hall and Bialek](#) Statistical mechanics of Twitter communities. G Hall and W Bialek, *Journal of Statistical Mechanics: Theory and Experiment* 093406 (2019); arXiv:1812.07029.
- 2019 [Chen et al](#) Searching for collective behavior in a small brain. X Chen, F Randi, AM Leifer, and W Bialek, *Physical Review E* **99**, 052418 (2019); arXiv:1810.07623.
- 2019 [Meshulam et al](#) Coarse-graining, fixed points, and scaling in a large population of neurons. L Meshulam, JL Gauthier, CD Brody, DW Tank, and W Bialek, *Physical Review Letters* **123**, 178103 (2019); arXiv:1809.08461.
- 2018 [Meshulam et al](#) Coarse-graining and hints of scaling in a population of 1000+ neurons. L Meshulam, JL Gauthier, CD Brody, DW Tank, and W Bialek, arXiv:1812.11904 [physics.bio-ph] (2018).
- 2018 [Antonetti et al](#) Precise spatial scaling in the early fly embryo. V Antonetti, W Bialek, T Gregor, G Muhaxheri, M Petkova, and M Scheeler, arXiv:1812.11384 [q-bio.MN] (2018).
- 2017 [Meshulam et al](#) Collective behavior of place and non-place neurons in the hippocampal network. L Meshulam, JL Gauthier, CD Brody, DW Tank, and W Bialek, *Neuron* **96**, 1178–1191 (2017); arXiv:1612.08935.
- 2017 [Bradde and Bialek](#) PCA meet RG. S Bradde and W Bialek, *Journal of Statistical Physics* **167**, 462–475 (2017); arXiv:1610.09733.
- 2016 [Berman et al](#) Predictability and hierarchy in *Drosophila* behavior. GJ Berman, W Bialek, and JW Shaevitz, *Proceedings of the National Academy of Sciences (USA)* **113**, 11943–11948 (2016); arXiv:1605.0362.

- 2016 Sokolowski et al Extending the dynamic range of transcription factor action by translational regulation. TR Sokolowski, AM Walczak, W Bialek, and G Tkačik, *Physical Review E* **93**, 022404 (2016); arXiv:1507.02562.
- 2016 Castellana et al Entropic forces in a non-equilibrium system: Flocks of birds. M Castellana, W Bialek, A Cavagna, and I Giardina, *Physical Review E* **93**, 052416 (2016); arXiv:1412.8654.
- 2015 Tkačik et al Thermodynamics and signatures of criticality in a network of neurons. G Tkačik, T Mora, O Marre, D Amodei, SE Palmer, MJ Berry II, and W Bialek, *Proceedings of the National Academy of Sciences (USA)* **112**, 11508–11513 (2015); arXiv:1407.5946.
- 2015 Palmer et al Predictive information in a sensory population. SE Palmer, O Marre, MJ Berry II, and W Bialek. *Proceedings of the National Academy of Sciences (USA)* **112**, 6908–6913 (2015); arXiv:1307.0225.
- 2015 Lee et al Statistical mechanics of the US Supreme Court. ED Lee, CP Broedersz, and W Bialek. *Journal of Statistical Physics* **160**, 275–301 (2015); arXiv:1306.5004.
- 2014 Chaisanguanthum et al The neural code for motor control in the cerebellum and oculomotor brainstem. KS Chaisanguanthum, M Joshua, JF Medina, W Bialek, and SG Lisberger, *eNeuro* **1**, 0004–14 (2014).
- 2014 Castellana and Bialek Inverse spin glass and related maximum entropy problems. M Castellana and W Bialek, *Physical Review Letters* **113**, 117204 (2014); arXiv:1312.0886.
- 2014 Berman et al Mapping the stereotyped behaviour of freely moving fruit flies. GJ Berman, DM Choi, W Bialek, and JW Shaevitz, *Journal of the Royal Society Interface* **11**, 20146072 (2014); arXiv:1310.4249.
- 2014 Krotov et al Morphogenesis at criticality? D Krotov, JO Dubuis, T Gregor, and W Bialek, *Proceedings of the National Academy of Sciences (USA)* **111**, 3683–3688 (2014); arXiv:1309.2614.

- 2012 Bialek et al Statistical mechanics for natural flocks of birds. W Bialek, A Cavagna, I Giardina, T Mora, E Silvestri, M Viale, and A Walczak, *Proceedings of the National Academy of Sciences (USA)* **109**, 4786–4791 (2012); arXiv:1107.0604.
- 2011 Stephens et al Emergence of long timescales and stereotyped behaviors in *Caenorhabditis elegans*. GJ Stephens, MB de Mesquita, WS Ryu, and W Bialek, *Proceedings of the National Academy of Sciences (USA)* **108**, 7286–7289 (2011); arXiv:0912.5232.

- 2011 [Schneidman et al](#) Synergy from silence in a combinatorial neural code. E Schneidman, JL Puchalla, RA Harris, W Bialek, and MJ Berry II, *Journal of Neuroscience* **31**, 15732–15741 (2011); arXiv:q-bio/0607017.
- 2010 [Mora et al](#) Maximum entropy models for antibody diversity. T Mora, AM Walczak, W Bialek, and CG Callan, *Proceedings of the National Academy of Sciences (USA)* **107**, 5405–5410 (2010); arXiv:0912.5175.
- 2010 [Azhar and Bialek](#) When are correlations strong? F Azhar and W Bialek, arXiv:1012.5987 [q-bio.NC] (2010).
- 2010 [Walczak et al](#) Optimizing information flow in small genetic networks. II: Feed-forward interaction. AM Walczak, G Tkačik, and W Bialek, *Physical Review E* **81**, 041905 (2010); arXiv:0912.5500.
- 2010 [Stephens et al](#) From modes to movement in *Caenorhabditis elegans*. GJ Stephens, W Bialek, and WS Ryu, *PLoS One* **5**, e13914 (2010); arXiv:0912.4760..
- 2010 [Stephens and Bialek](#) Statistical mechanics of letters in words. GJ Stephens and W Bialek, *Physical Review E* **81**, 066119 (2010); arXiv:0801.0253.
The original title, preserved in the arXiv version, was “Toward a statistical mechanics of four letter words.” This was rejected without review; the editors claimed that it was not physics. Some small changes to the text, some explanation, and a change in title resulted in more serious consideration.
